Re: Heidary v. Amazon.com, Inc & Ring LLC, Case No. 24-1580

A brief history of my background:

I am a 74 years master electrician with expertise in multiple areas including HAVC systems, and other related electrical engineering activities and residential and commercial constructions.

I was a successful businessman in IT and electrical engineering field with my own property and real estate. In 2014 due to mistakes committed by tax agency in Montgomery County of Maryland, I lost everything that I owned. I was a contractor with Pepco, which I identified several problems with newly used LED Lights and I recommended certain changes with the help of Maryland commissioner and engineers from Lockheed Martins to Pepco cooperation. For Pepco's case unfortunately I didn't register my invention and I couldn't file a claim. I learned from that mistakes and I patented my new two inventions including smoke detector with the camera system and monitoring and display system. I also have patented a charging system for Electrical Vehicles. I also recently I have applied for two new inventions (see attachment), one is a mobile Windmill system for EV cars and the other one is a system facilitating multi-floor communication with video interface. Unfortunately, due to my of financial situation, I cannot hire an attorney to assist me and, as you can see I haven't benefited from my inventios. I am very appreciative to the fact that the respected judges have changed my case from dismissal to rule 41. I am respectfully requesting the court protect my rights from Amazon and Ring LLC. I respectfully request a rehearing of my case with all the involved judges based on rule EN-BNC. I am extremely grateful to the judicial system allowing me to request this rehearing (I have dedicated almost 50 years of my life to this great country and I worked and contributed positively to this nation, it is very unfair at this old age to be forced to go to well fair for my survival) .

Mr. Haldary,

Thank you for explaining your innovative wiring solution to improve the safety of LED retrofitted fixtures. We applaud you for looking to improve practices used in the electrical trades.

Pepco and Delmarva Power are committed to saving energy and costs for our customers with the C&I Energy Saving Programs. We also are always diligent and focused on safety throughout our business. While we see potential benefits in your idea, the local building codes, standards and practices are developed and promulgated through national, state and local groups responsible for the electrical design and construction industry, not the local utilities.

We recommend that you discuss your idea with lighting manufacturers, electrician unions, Underwriter Laboratories (UL), and code organizations to identify peers in the field who may be commonly aligned with your objectives. You have clearly invested a good deal of thought and effort in developing this innovative idea, but will need to work with the appropriate decision-makers to include this as a product option, installation best practice, or an actual change to a building and electrical code.

~~When you succeed in commercializing the product we can consider it within the collaborative utility working group as an installation requirement and make a decision for inclusion in future programs.~~

Thank you for your participation and innovation!

Manuel Vera
